Overview

An undergraduate with a strong foundation in **Object-Oriented Programming (OOP)** and **Data Structures & Algorithms (DSA)**, and proficiency in **Java, Python, SQL** and **C**. I have hands-on experience in designing and working knowledge of **Artificial Intelligence**, including **Gen AI, Agentic AI, LLMs**, and **RAG**, along with a clear understanding of machine learning fundamentals and the basics of **Natural Language Processing (NLP)** and **Deep Learning**. I am skilled in building **responsive and interactive web applications** using **HTML, CSS, JavaScript, and React**, with a focus on usability and performance. Additionally, I have strong exposure to **Data Science**, including data analysis, manipulation, and visualization using relevant libraries and frameworks to extract insights from data.

Education

Kalinga Institute of Industrial Technology University 2023 – Present
Bhubaneswar, Odisha
B.Tech in Computer Science & Communication Engineering

- CGPA: **8.02/10**
- Coursework: DSA, OOPs, Computer Networks, Operating Systems, DBMS, Cloud Computing

Seventh Day Adventist Senior Secondary School 2008 – 2023
Lucknow, Uttar Pradesh

- Intermediate: 71.25%
- High School: 85.20%

Projects

- **Cloud Misconfiguration Detection:** A security solution using **AWS services** and **CSPM concepts** to detect cloud misconfigurations, improving expertise in cloud security, IAM, risk assessment, and secure deployment practices.
- **Multi Label Human Sentimeter Analyzer:** A live **one-on-one camera view** to analyze facial expressions and infer human inner emotions and behavioral patterns.
- **Eye Motion Detector:** An eye motion detector using Python and OpenCV that tracks eye movements in real-time using a webcam.
- **Drum Kit:** A Drum Kit game where users can play drum sounds by clicking on buttons.

I continuously expand my technical expertise through real-world projects showcased in my **portfolio**.

Skills

Languages	Java, Python, C, JavaScript, SQL, HTML, CSS
Technologies	OpenCV, Docker, AWS, CI/CD, UI&UX, Web & Graphic Designing
Databases	MySQL, Oracle Database, MongoDB; knowledge of data modelling (ERD & DDL)
Data Science	Visualization & manipulation using NumPy, Pandas, Seaborn, Matplotlib
Machine Learning	Supervised & Unsupervised Learning; Basic NLP with deep learning principles
Artificial Intelligence	Generative AI, Agentic AI; strong knowledge of RAG and LLMs
